	334 Silverdale Road, one of a pair of semi-detached post-war houses. It consists of a single storey and first floor rear extension, including removal of an existing conservatory.	
	There are new windows proposed which project further than the originals from the bedroom position at first floor level rear. Those new windows will have a detrimental impact on the privacy and amenity for the residents of 29 and 30 Half Way Place ST56EH as they overlook the rear gardens.	
	On that basis Silverdale PC object to the proposal and request some form of screening to be constructed to preserve the privacy and amenity of the affected residents at 31 and 30 Half Way Place.	
73/22	Walley's Quarry Ltd Landfill Walley's Quarry Liaison Meeting on 3 March updates. HA and CJ attended a meeting on 3 March 2022. The Coal Authority had given a presentation and discussed questions relating to the contamination of mine water into Silverdale Brook but no new information.  There was a new EA report on the first six months of the air quality monitoring. There was an issue that a high level of complaints over 1,000 on one day that had preceded the start of air quality monitoring. HA is to read and comment on the Silverdale Internal Report on the Citizens page of The Environmental Health website. NBC continues to pursue the Abatement Notice.  There is a new Stop the Stink Group focusing on children's' health, Walley's Victims which held a protest march on 26 February.  To discuss Walley's Quarry permit variation consultation.  EA permit Variation Application 21 02 22- 21 03 22 is a variation for 1 Removal of carbon dioxide compliance limits for 12 specified boreholes and an increase in methane compliance limit in borehole BH17D and 2 Use of geosynthetic capping system as an operational technique.  HA has taken advice and comments as follows There is a substantial increase in gases which can be either collected, cleaned and utilised in the grid such a methane or destroyed safely. There is movement in the waste profile so a flexible coating is required by the operator as a permanent membrane in certain sections.	HA
	Our Response is that Silverdale Parish Council notes the consultation is retrospective (approved in January 2021) and in a sense pointless and seeks assurances from the Environment Agency that the new envelope system in 2 is consistent with British Standards and will be able to maintain integrity in the event of further differential settlement at Cell 2.

	Parish Council requests that Environment Agency checks the rate of differential settlement	
	in sensitive areas close to human occupation with the operator and whether the proposal
